

Temperature and Magnitude of Stars by Type

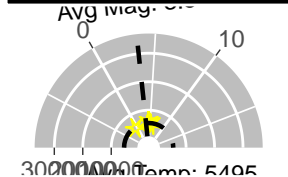

Note: Magnitude is a measure of brightness on a logarithmic scale – lower values equate to higher brightness

Star Surface Temperature (Kelvin)

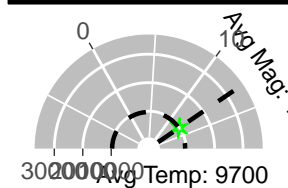

O – Blue Stars – 1

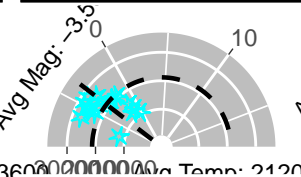

G – Yellow Stars – 4

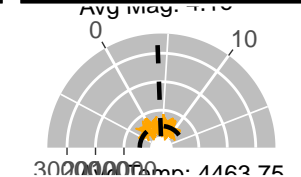

DF – White Dwarf – 1

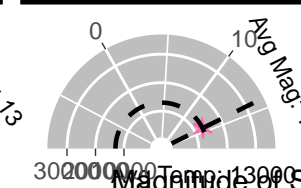

B – Blue White Stars – 1

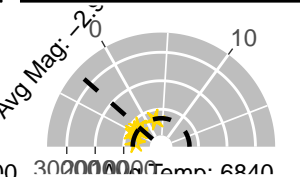

K – Orange Stars – 16

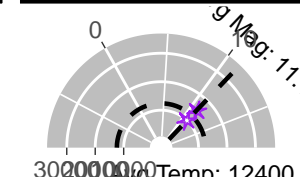

DB – White Dwarf – 1

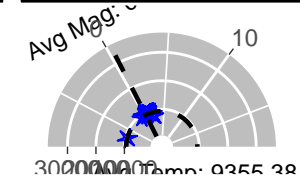

F – Yellow White Stars – 1

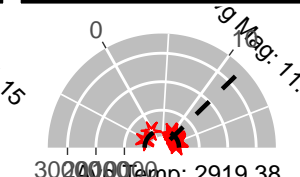

DA – White Dwarf – 2

A – White Stars – 13

M – Red Stars – 32

Magnitude of Star (Luminosity)
